

## **Golden Opportunity to Reach 100,000 People and Ultimately Millions! For a gift of \$20 a Month...**

**Grenada Family Network (GFN)** sent out a request for help in January and is happy to announce that support is growing! Locally, several people have given donations, a couple of people committed to give \$20 or \$25 a month, one church committed to give a monthly amount (equivalent to about 10% of their congregation giving \$20 a month), and three donations were made directly to the GFN bank account at RBTT. From North America, GFN received one commitment for \$20 a month and a donation that should cover the cost of all the electrical materials necessary to expand radio broadcasts to northern Grenada on 100.3 FM. In addition to all that, one local supporter offered the use of his 4x4 pickup to move equipment up to the transmitter sites. God is blessing!

During the last week of February, a new STL antenna for TV broadcast was installed which will soon be used to broadcast on Channel 4 and orders were placed for the necessary electrical equipment for the radio transmitters in the north. In order to install this God-given equipment, there remains a need for support of monthly operating expenses. Now is the ideal time to take advantage of this **Golden Opportunity** to expand GFN's radio broadcast to all of Grenada.

Would you be willing to help?

**GFN** seeks 950 people who would be willing to commit \$20 a month to help GFN **grow**. This \$20 will enable current bills to be paid, and it will cover the cost of renting additional tower space for broadcast antennas as well as the increased electricity expenses for new broadcasts in the north on 100.3 FM. Furthermore, it will help to purchase needed TV station equipment and provide a stipend for volunteers.

GFN Studio & Broadcast Facility

**Current radio coverage** is south of red lines on 91.3FM. Expanded coverage will soon include area north of blues lines on 100.3FM. TV will soon cover area south of red lines on Channel 4.

Additionally, GFN is seeking one-time donors who are willing to invest larger amounts in order to expedite the process of growth. Editing equipment for the TV station is still needed and resuming construction of GFN's new studio and broadcast facility would be ideal. Once the studio and broadcast facility is built, production of local programs can begin (which has been a long standing goal), and ultimately, GFN will be able to broadcast via satellite to the English speaking world.
